Kingsway Charities November Newsletter

"I only take the medicine when I need it, so it will last." Our medical teams hear that a lot about a patient's medication when serving the poor in other countries.

Valdez Charitable Foundation from California sent a team to the Philippines and reported the following to us.

"I saw a 15 year old girl with her mom struggling thru the crowd. She said "Doctor, my daughter has heart failure." I examined the patient and looked at her prescription which her mom handed to me. She had 5 listed medicines and one of them was Ramipril 5 mg. Quantity #4. The other medicine listed had quantity like 7. My question to myself was, "How could we improve this young girl's outcome and quality of life with just 4 tablets of medicine?"

With the support of Kingsway Charities, I was able to provide the patient with a 1 year supply of her ace inhibitor. Another patient was a 3 yr old boy who went to the hot springs and developed swelling of hand and cellulitis. Around his hand were 3 wrapped leaves, and a scarf to make it cool. I learn a lot from seeing patients like this. It gives me the drive to provide more needed care to the underserved. I thank Kingsway Charities for their support in providing these much needed medications."

Our thanks go to you, our donors, and all those involved in getting your medical donations to us. The effectiveness of the medicines are experienced around the globe.

Sincerely,

A handwritten signature in black ink that reads "Albert Hester".
